Hamza Merdan

# BikeWatch – Enhancing Bike Security with Affordable IoT

Presenters – Hamza Merdan, Sebastian Sovaliescu

Internet of Things, Department of Computer Science, University of Illinois Urbana-Champaign

## Motivation: Prevent Bike Thefts

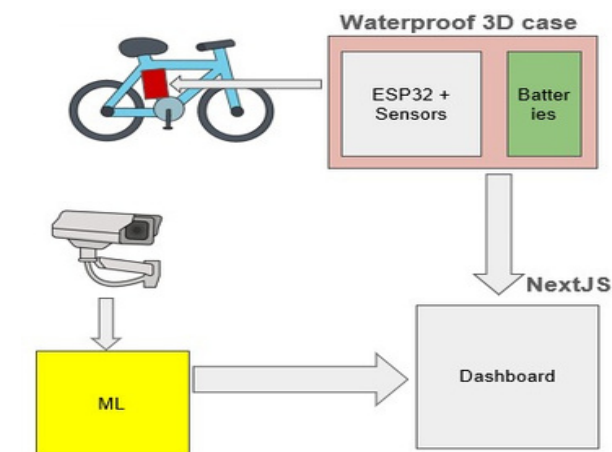

In 2 years, over **850+ bike theft cases** were reported in the CU community.\*

## Proposed Solution

An affordable smart bike security system with AI-powered monitoring, real-time alerts, and remote tracking via a web dashboard.

- 3.7V LiPo battery powered ESP32 with Wi-Fi and Bluetooth displays its status on a web app through the cloud.
- A Raspberry Pi acts as a server, security camera, and microphone to capture detected faces, makes alarm sounds, and live-stream on a dashboard.

## Related Work

\$250

## Our Solution

\$100

AI

## Challenges

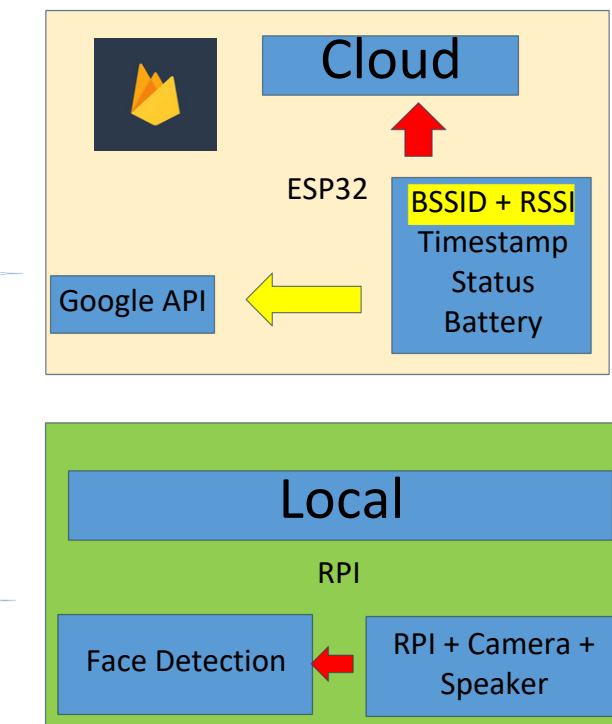

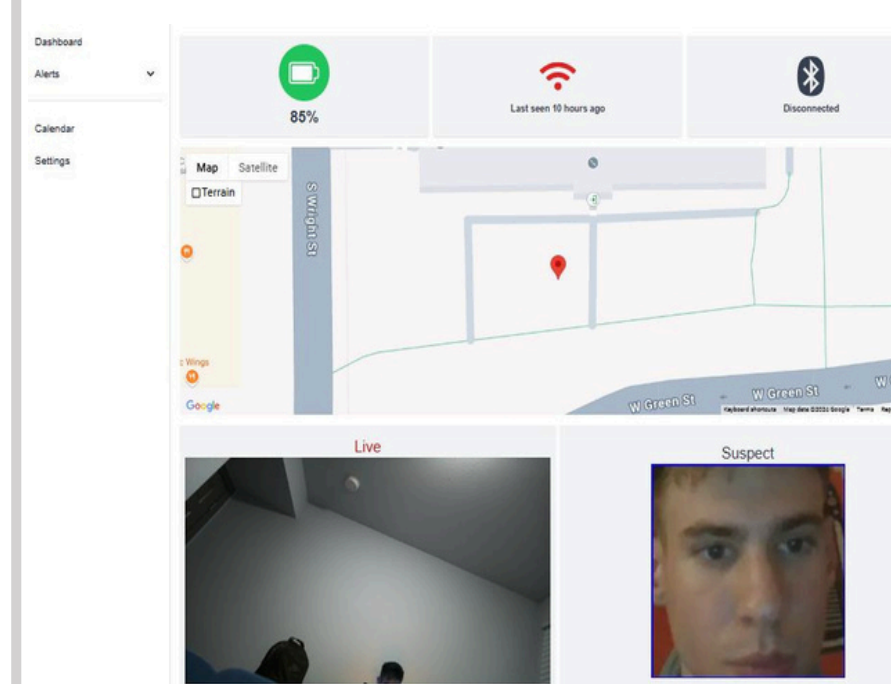

Wi-Fi Geofencing

Face Detection

Memory Space

Battery Efficiency

## Approach

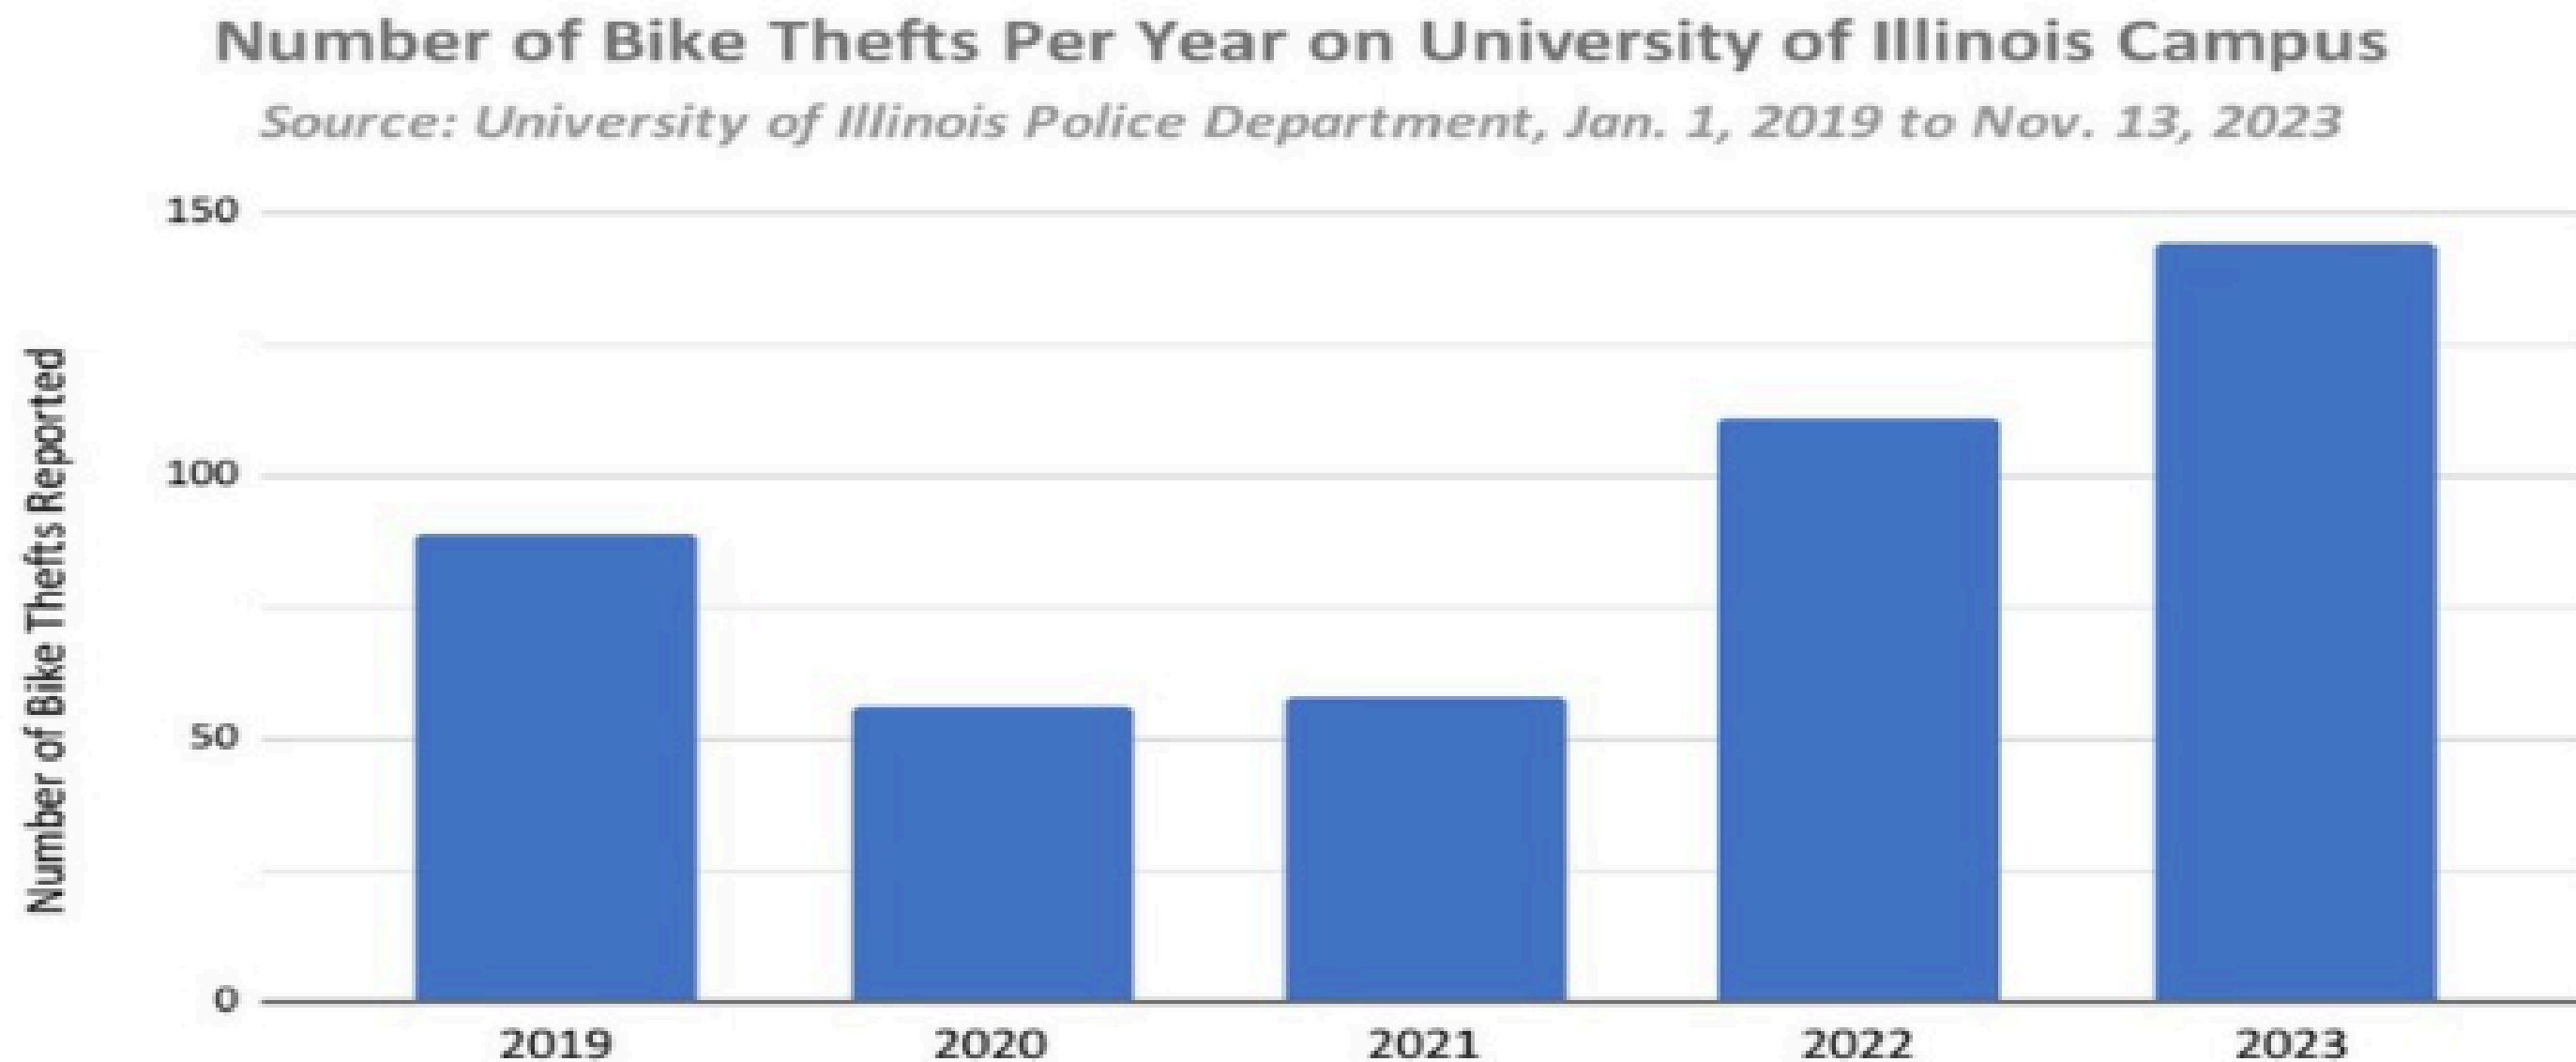

## Main Results

Combining systems creatively can improve accuracy, decrease cost, and extend battery life.
